# Our Offerings

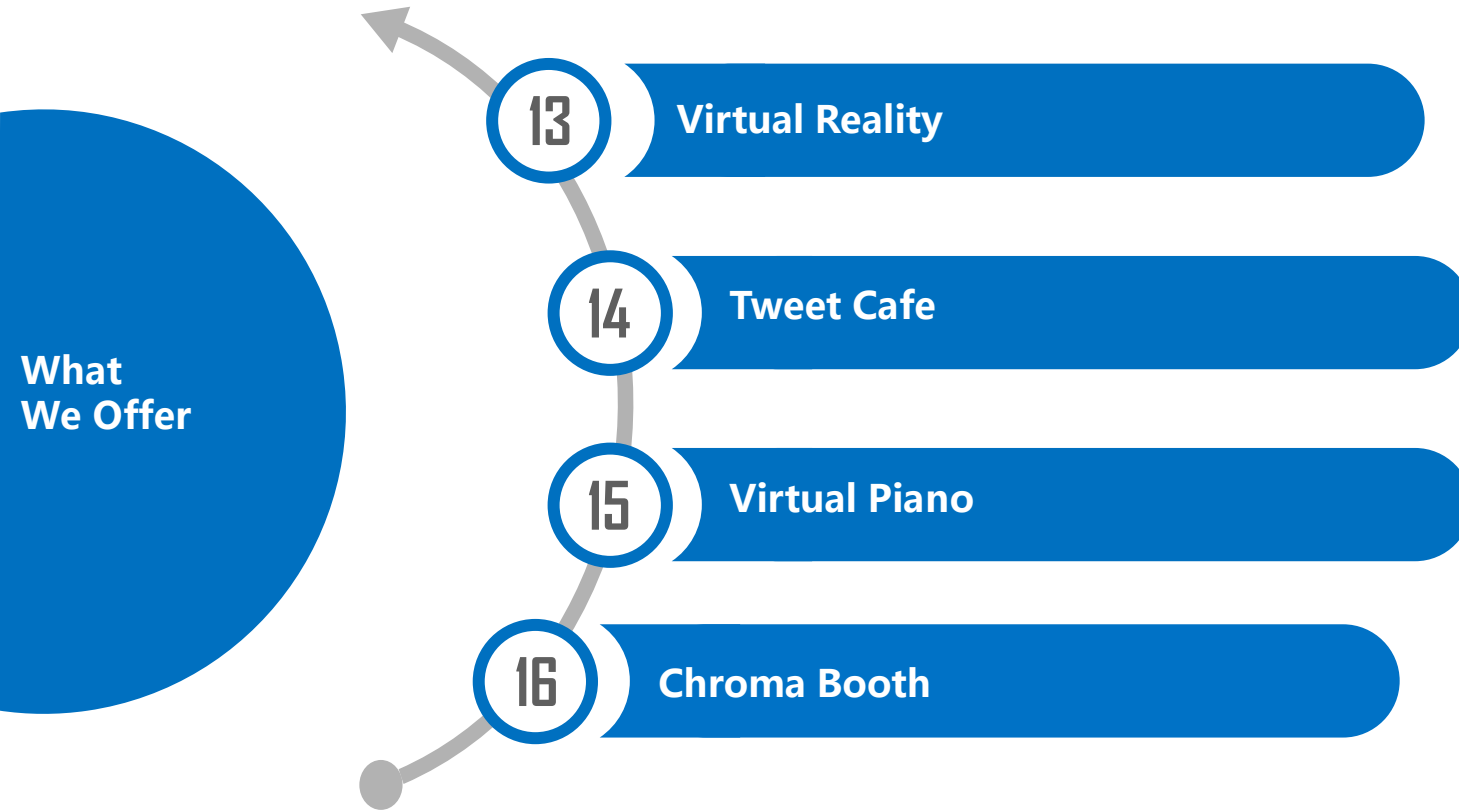

We provide number of services for any individual, institutes or any corporate organization. We have diversified our portfolio providing exclusives services Like Interactive Displays, Experiential Technologies and Event Management Solutions. We are a emerging name for bringing in the most innovative ideas when it comes to unique brand promotions by using the latest visual technologies. Several solutions we offer for advertising or events can bring more possibilities that can turn any static activity dynamically by engaging individuals of all age groups to play with the brand or theme anywhere either on a stage , a Vip lounge or a corporate lobby. Our solutions can immerse anyone in a new experience of Interactive audiovisual effects that can significantly enhance their overall activities they dance, play , work and above all have some fun.

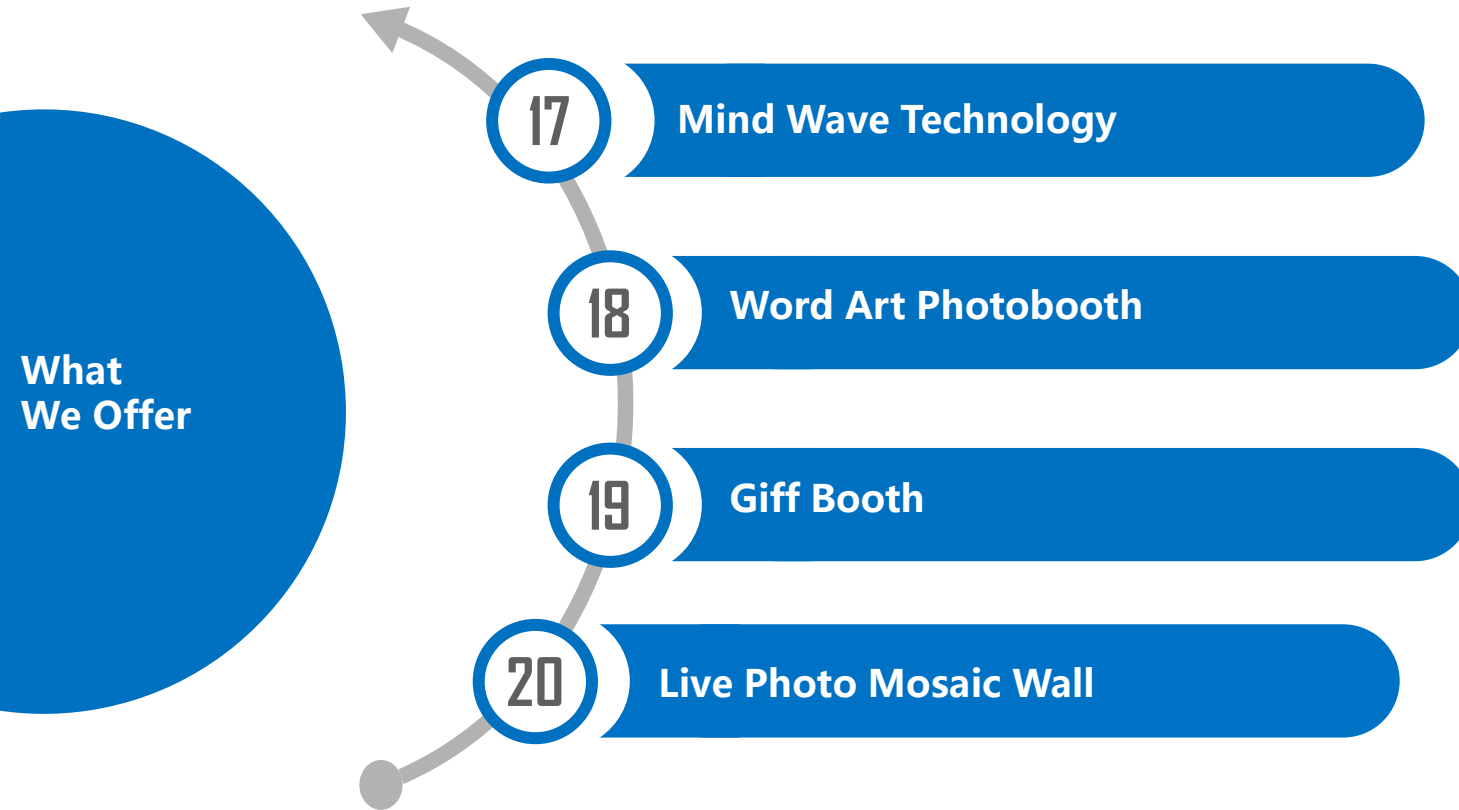

# 3D Interactive Floor

- Interactive 3D Floor projection display system comes with a series of features that makes a favorite solution for both advertising and events by engaging individuals of all age to play with it.
- It comes with an integration of software and hardware with multiple varieties of content which Interactive floor can be customized based on the requirement whether it could be for brand promotion
- Event entry or a game for children's and many more possibilities that can turn any static display into a dynamic environment that responds to peoples movement.

# Digital Graffiti Wall

- A state of the art digital graffiti solution designed and developed for the events and entertainments industry, using bespoke software to replicate the urban graffiti experience without the mess or toxic fumes.
- Our technology-packed graffiti cans allow you to paint directly onto the digital graffiti wall, creating your very own works of art, whatever your skill level. You can use one of our fantastic custom stencils to make your mark. Special effects give your work the look and feel of real graffiti and each design can be saved from the digital graffiti wall, uploaded to social media, emailed, or used to create mementos such as T-shirts, mugs or stickers. So let loose your inner Banks and get creating!

# Fog screen Display

- Fog Screen projection screen produces a thin curtain of “dry” fog that serves as a translucent projection screen, displaying images that literally float in the air.
- It's as simple as it is stunning. With the use of ordinary tap water and digital technology, Fog Screen projection screen enables projected images to literally float in the air, creating a brand new medium to captivate and fascinate audiences. You can walk right through a Fog Screen projection screen without getting wet. The microscopic fog droplets actually feel dry to the touch, just like air.

# Gesture Based Kinect Display

- Kinect system is a hardware + software solution for interactive advertising, exhibition, education, etc. It provides a direct way of interacting with customers that to make your products Eye-catching and appealing
- Kinect can be integrated to various display medium like LCD TV, LED Screen, Video wall or just an AV Screen, controlling images, games or content with body gestures can literally leave anyone stunned, which is why Kinect Technology is used so often for various product launches, trade shows, retail stores, offices, museums and other venues..

# Augmented Reality

- This is one of the latest and most increasingly popular solutions which can be used to show a evolving 3D animation on a large LED Screen. This novel product can create an immersive experience for your customers and clients, which allows them to engage more with your product. This technology cannot only be used for advertising and brand promotional, but can also be used as an educational tool in schools or simply add value to the entertainment Industry.
- Our System makes it possible for people to see themselves interact with 3D virtual animation in a monitor or a projector display . If you want to find a way to promote your products or display information, Augmented Reality must be the best choice to grab the attentions.

# Virtual Mannequin

- virtual mannequin. A video of a Model (or object) is recorded and an acrylic cut - out is created using the outline of the subjects shape and size. Imported Rear Projection Film is applied to the laser cut acrylic, calculating the distance and subjects size , suitable projections are done to create life like model.
- A projector is placed behind, and connected to your computer media player, mapping your video in the front side. Directional hidden speakers play the sound, we can also use vfx or animations to enhance the visual to have a talking model- that never needs a break!

# Selfie Slingshot

- Guests will be given touch screen enabled digital slingshots to interact.
- They will click a selfie, share what they feel about the event and slingshot the message towards the huge digital message board.
- The message appears like a paint ball splash with guest's picture, name and message.
- We can also extend the same activity using our custom features post activity with Instant photo printouts with logo and event memorable.

# Excitement Meter

- This is the real test to measure how excited all the attendees are (especially after few drinks).
- The motion detector camera will measure the excitement level of a participant based on his/her movements on the dance floor.
- A participant needs to jump/dance as vigorously as possible as loud music gets played.
- The most active one will be adjudged the most excited one through a graphic interface which rates them from 'little excited' to 'insanely excited'

# Virtual Paparazzi

- A walk through tunnel/enclosure was created wherein sidewalls were projected video screens showing prerecorded video of fans waiting to click photos of the attendees.
- On arrival of each Guest these virtual fans cheered and welcome them while clicking pictures ala Paparazzi.

# Peddle to Light up

- As the user start cycling the device will detect the speed by calculating the number of rotation per minute.
- We have a custom made hardware device which will attach to the wheels of the cycle. The speed will be sent to the computer which makes the calculations and send the signals to hardware system to fill the beer or lighten up the logo.
- Users need to peddle the cycle as the user speed increases the bottle start filling up. Else we can have company logo where as the cycles speed increases the logo start lighten up and the winner will get goodie.

# 360 Video Booth

- All the guests will be able to click their 360 degree videos as they stand and pose and our camera does the rest.
- Guests will come and get their 360 degree videos clicked and these short clips will then be uploaded onto their social media accounts.
- The videos can also have custom brand logo and jingles of the advert if any to add more recall value to the activity.

# Photo Booth

- We'll set up Photo Booths wherein Guests/visitors/Delegates will come to our booth, pose in front of the screen and get clicked with your event themed layout and post their pictures real time on their connected FB/Twitter accounts.
- An event album is created on their FB accounts and every pic has the customized caption with a link/hashtag.
- Every pic is posted with a custom superimposed frame.

# Virtual Reality

- Virtual Reality experience which you can experience with two controllers to experience the new world.
- It provides an immersive experience to the user as the user gets totally indulged into the virtual environment.
- We can create custom experiences as per the brand and client requirements and offer solutions accordingly.
- Our most popular VR gaming stations are really mind blogging for any occasion.

# Tweet Cafe

- A selection of goodies, coffee and other food items will be kept in multiple boxes. A number and a hashtag would be given to each of these boxes.
- It attracts crowd by providing surprise gift when people tweet using the provided hashtag. The user simply has to tweet the hashtag with the desired order number. An electronic queuing system would be set up to notify the visitors about their orders.
- The door opens when an order is arrived and the visitor can receive it. This activity can create social media buzz and helps your campaign to go viral.

# Chroma Booth

- Chroma Booth makes an image from the ground up to fit your event. We find on create unique digital Backdrops, design light to match it, and use custom built apps to create a high quality experience as well as a production quality image.
- We are part photographers, part builders, part geeks. All these come to play when you take people and throw them into an open air booth and produce flattering green screen images in seconds.
- Out of the booth and onto one of our share stations. You can see your photos, share them on social media and print the ones you like.

# Mind Wave Technology

- Using a special sensor called neurosky, participant has to wear that sensor on head.
- By measuring the alpha, beta and gamma wavelength with eye blinks using neuro sensors we can capture concentrations levels
- By measuring the instantaneous concentrations of the participants, we can work on exciting event ideas where we could move objects (objects can be anything like bike, car, food or Merchandise).
- Exciting Competition between two or more and much more ideas can be developed as per the theme or the brand.

-

# Giff Booth

- Visitors would pose in front of a camera installed screen.
- The screen will click multiple pictures of the visitors and compile them to form a .gif image.
- We intend to basically capture their energy in action and socially Connect to their friends out there.
- Once the photos are clicked we can have the boomerang gif conversion with custom branding and shared on email and social media.

# Live Photo Mosaic Booth

- Our Photo Mosaic products elevate event and marketing campaigns by visually connecting people through branded photo compilations.
- Creates jaw-dropping digital & physical mosaics from live event photos in real-time; using an exclusive, state-of-the-art algorithm.
- The Photo Mosaic Wall automatically prints photos as stickers. Guests can engage in the interactive experience by placing their photo stickers on the mosaic board.

## Our Approach

## Upcoming New Introductions

# Case Study 1 – Interactive Floor Games

As one of the leading chain of Maternity and Child care hospitals of India, Cloud nine is a symbol of excellence in specialized hospitals for women and kids , They chose Interactive floor display solutions for their hospitals just to create an environment for kids at the doctor consultation areas to ward of the feelings of fear among kids due to vaccinations and induce some fun gaming, entertaining elements to create the ambience by making the environment kids friendly .

# Case Study 2 – Bajaj Discover launch using Fog Screen

The Impact of using our state of the art fog screen display technology left the audience spell bounded at the launch of Bajaj Discover 150 cc bike at Bangalore.

The event comprised of Bajaj customers dealers and media representatives to experience this unique launch as the idea was to bring this launch with a monsoon theme for which our fog screen concept created a spectacular projection display medium in thin air, bringing out the dazzling "Ek Naya Josh" Tagline more impressively and the bike was driven out of this display , which jazzed up the entire event space. we thank for the entire effort that was wonderfully supervised, serviced and supported by our partners Spinx Adonis,Pune.

# Case Study 3 – Goldman Sachs using Interactive wall

The Goldman Sachs Group, Inc. is a leading global investment banking, securities and investment management firm that provides a wide range of financial services globally.

Innovation has always been highly valued and to amplify the ambience and introduce state of the art edutainment facility for their new campus at Bangalore, They equipped with an Interactive Wall display system which will be used by expert kids. These displays showcase entertaining elements and impactful learning materials at the same time combining both as educative games. A specially unforgettable visual learning experience is created using multiple effects provided by the Interactive Wall system.

01

To create ideal zone to make contacts and friends over the course of event.

02

A blend of physical + digital activations resulting in novel experience.

## Why they use us

03

By going unique will put up a genre-busting, path breaking, social advertising festival.

04

To create a platform with a series of fun activities for all the attendees.

And many more.....

**Thank You**
